Hawaii Agriculture Research Center, formerly the Hawaiian Sugar Planters' Association formed in 1895 is seeking an agronomist to join its staff. It is a non-profit crop research organization originally funded by the sugarcane industry in Hawaii. It is currently funded by grants and donations; works collaboratively with the USDA research station in Hilo and the University of Hawaii College of Tropical Agriculture and Human Resources. It has research relationships with the University of Illinois and Texas A & M.

Position Available: Agronomist

Job Location: O'ahu, Hawaii

Job Level: Master's Degree in Agronomy or equivalent. The applicant should have experience in operating a farm.

Job Description: A full-time 12 month Agronomist position is currently available. This position provides overall leadership in all agronomic matters for Hawaii Agriculture Research Center's field projects and for field site maintenance. The position supports the other research staff in the proper design of field trials and their maintenance. The organization concentrates on tropical crops and forestry emphasizing the identification of new crops or production practices through plant breeding and varietal evaluation. It also works in integrated pest management, soil health and has initiated a privately funded Agricultural/Solar Research and Development Center.

Salary Information: Salary is in the \$60K range, depending on qualifications.

Benefits: HARC has a defined benefit pension plan, but also offers a non-matched 401K plan; generous health benefits, vacation, and sick leave.

Housing can be provided.
